

STAGE SEVEN • HARD SKILLS

FIRSTS

SESSION DEBRIEF / CLOSE-OUT SCRIPT

How to end each section, summarize, and bridge to what's next

A Citrus Edition Facilitator Resource • Companion to the FIRSTS Manual

BY AYOMIDE AYENI

FIRSTS • Session Debrief / Close-Out Script

Stage Seven • Hard Skills

WHY THIS MATTERS

Given this stage's thirteen sub-sessions, these close-outs are organized by section (the point where a genuine chunk of related FIRSTS wraps up) rather than by every individual sub-session. Use the final line of each section's close-out at the end of its last sub-session; the earlier sub-session within a section can end with a brief, informal “pick up here next time” rather than a full close-out.

Close-Out Scripts by Section

Data & Analysis (1A/1B)

"Across these two sub-sessions, you've gone from basic spreadsheet formulas to cleaning messy data, spotting real trends, and writing a clear interpretation of what you found."

"The throughline: numbers alone don't matter until you can explain what they genuinely mean. That's the skill this whole section built toward."

Documents & Written Communication (2A/2B)

"You've practiced writing for clarity, for busy readers, and for people with less context than you — three genuinely distinct writing challenges."

"Before Planning & Project Management: think about one real project you could plan and eventually execute across the next three sub-sessions."

Planning & Project Management (3A/3B/3C)

"That's the full arc: a real plan, real execution, and a real documented close. This is the largest section in the stage, and you just completed all eighteen of its FIRSTS."

"Before Visual & Presentation Tools: bring a phone for recording, and start an online portfolio if you don't already have one."

Visual & Presentation Tools (4A/4B)

"You've built decks, diagrams, and infographics, and tested your ability to explain technical work to a genuinely non-technical audience."

"Before Digital Tools & Systems: bring a laptop with real access to a collaboration tool and an automation-capable tool."

Digital Tools & Systems (5A/5B)

"From basic collaboration tools through automation, integration, and a full multi-tool project — you've built genuine technical infrastructure fluency."

"Before Collaboration & Reflection: gather everything you've completed across this entire stage. Our final two sub-sessions look back across all of it."

Collaboration & Reflection — Full Stage Close (6A/6B)

"That's Stage Seven, complete — the largest stage in this entire program, ninety FIRSTS across six sections and thirteen sub-sessions."

"Your honest self-assessment and development plan from today are the real takeaway, not just having touched every FIRST. Knowing where to focus next matters more than having done everything equally."

"Before we close: name one specific hard skill from today's self-assessment you're most committed to developing further."

"Stage Eight picks up with Soft Skills — a genuine shift from tools and technical output toward interpersonal and self-management skills."
