Which Activities Landed?

Which single FIRST produced the most genuine, energized discussion this cohort? Why do you think that was?

Which single FIRST fell flattest, felt rushed, or stayed too abstract? What would you change about it?

Did Session 3's length and density work as a single sitting, or should it be split for future cohorts?

Did any of the group-adapted exercises (Group Versions of Key Exercises document) feel forced rather than genuinely additive? Which ones?

Application vs. Abstraction

Did most participants apply these frameworks to genuinely real, specific problems, or did answers tend to stay hypothetical and generic?

Which FIRST, if any, was hardest for participants to connect to a real example?

Content & Materials

Did you encounter any content errors or inconsistencies in the Manual, Templates, or facilitator materials?

Was the pre-work handout genuinely followed, especially bringing a real decision or problem to each session?

Were the FAQ's anticipated questions the ones participants actually asked? What question came up that isn't currently in the FAQ?

Format (In-Person / Online / Hybrid)

Which format did you run this cohort in?

Did the Adaptation Notes cover what you actually needed for this stage's group activities?

Open Feedback

What's one specific change you'd make to Stage Five's structure, content, or materials before the next cohort?

Anything else worth flagging?
