ADAPTATION NOTES

Online vs. in-person format notes for every activity that changes shape

A Citrus Edition Facilitator Resource • Companion to the FIRSTS Manual

FIRSTS • Adaptation Notes

Stage Thirteen • Teamwork & Collaboration

PURPOSE

Stage Thirteen is built around structured team exercises — simultaneous reveals, silent-start brainstormers, round-robins — which genuinely change mechanics between formats more than in most other stages. One FIRST (Q16, Remote Team Experience) is actually easier to teach authentically in an online session than an in-person one, since a remote cohort is already living it.

This document covers every activity across Stage Thirteen's Session Plan and Group Versions of Key Exercises documents that genuinely changes shape between formats.

Format Notes by Activity

Activity	In-Person	Online
Silent-Start Brainstorm (FIRST Q6, from Group Versions doc)	Everyone writes on sticky notes or paper simultaneously, then posts them on a shared wall.	Everyone types into a shared doc or digital whiteboard simultaneously (screen share the doc so it's visible); mute microphones during the silent phase to reduce temptation to jump in verbally.
Simultaneous Reveal (FIRST Q2, Q7, Q23)	Physical index cards flipped or held up at the same time.	Use a shared poll or form that reveals answers only once everyone has submitted, not a chat message (which is visible as it's typed and biases later answers).
Structured Round-Robin (FIRST Q11)	Genuine physical order around a table, easy to track visually.	Use "raise hand" in strict order, or call names directly from a participant list, since there's no visible seating order to follow.
Two-Question Review Circle (FIRST Q19, from Group Versions doc)	Small groups review physical or shared-screen work together.	Breakout rooms of 3, with the work shared via screen share or a shared doc link posted in the breakout room instructions.
Cross-Functional / Multicultural / Remote reflection (FIRSTS Q14-Q16)	Small group discussion works naturally; remote experience (Q16) may need to draw on past experience if the cohort is fully co-located.	These land more directly online, since a remote cohort is already experiencing FIRST Q16 in real time — name that explicitly rather than treating it as purely hypothetical.
Team Handoff practice (FIRST Q18)	Pairs physically exchange a printed or written handoff document.	Pairs exchange a shared doc link in a breakout room; have the receiving partner actually try to act on it using only the document, not a live explanation, to genuinely test its completeness.
Start / Stop / Continue Retrospective (FIRST Q27, from Group Versions doc)	Written on a whiteboard or large paper, visible to the whole team throughout.	Use a shared doc with three columns, editable by everyone in real time; this actually works well online since everyone can see updates land live.
Full-group share-outs / closing rounds	Genuine round-robin around the room.	Use "raise hand" or call names directly from a list rather than open-floor, which tends to stall on video.

GENERAL HYBRID GUIDANCE

For any structured team exercise (simultaneous reveal, round-robin, silent-start brainstorm), a hybrid session should keep the mechanism consistent across in-person and remote participants rather than running two different versions in parallel — for example, if using a shared poll for simultaneous reveal, have in-person participants submit through the same poll on their own devices rather than using physical cards while remote participants use the poll.

For Team Handoff practice (Q18) in a hybrid session, pair people across the in-person/remote divide deliberately at least once — this closely mirrors the real handoff challenges many teams actually face when part of the team is co-located and part isn't.
