ADAPTATION NOTES

Online vs. in-person format notes for every activity that changes shape

A Citrus Edition Facilitator Resource • Companion to the FIRSTS Manual

FIRSTS • Adaptation Notes

Stage Fourteen • Project Management

PURPOSE

Stage Fourteen's group adaptations lean heavily on pairs and small groups working through structured exercises together, most involving visible documents (a stakeholder map, a risk register) that a partner needs to actually see, not just hear described.

This document covers every activity across Stage Fourteen's Session Plan and Group Versions of Key Exercises documents that genuinely changes shape between formats.

Format Notes by Activity

Activity	In-Person	Online
Napkin Project Plan / Silent Status Update (icebreakers)	Pairs turn to face each other; a shared whiteboard collects group answers visibly.	Breakout rooms of 2; use a shared doc or annotation tool instead of a physical whiteboard to collect group answers.
Interview Relay (FIRST R4, from Group Versions doc)	Pairs face each other directly; easier to read whether an answer is genuinely thought through or rushed.	Breakout rooms of 2. Encourage participants to actually say answers out loud rather than typing them, to preserve the natural back-and-forth of a real interview.
Risk Speed-Round (FIRST R9)	Small groups of 3–4 around a table, a visible timer keeps the 60-second pace.	Breakout rooms of 3–4. Post the 60-second-per-person structure in the breakout instructions since there's no facilitator physically visible to help pace it.
Blind Spot Check (FIRST R11)	Pairs review a printed or shared stakeholder map together.	Screen-share the stakeholder map directly in the breakout room rather than describing it verbally — seeing the actual list makes it easier for Partner B to spot a genuine gap.
Change Request Roleplay (FIRST R15)	Pairs face each other; body language cues help signal when a partner is genuinely resisting versus caving.	Breakout rooms of 2. Since tone and hesitation are harder to read on video, debrief explicitly afterward on whether the response held the line or started to slip.
Ceremony Jigsaw (FIRST R22)	Small groups cluster physically to research and prepare their assigned ceremony together.	Breakout rooms of 3–4, with a shared doc for each group to note their findings before presenting back to the main room.
Full-group share-outs / closing rounds	Genuine round-robin around the room.	Use “raise hand” or call names directly from a list rather than open-floor, which tends to stall on video.

GENERAL HYBRID GUIDANCE

For any exercise involving a shared document (stakeholder maps, risk registers, timelines), a hybrid session should default to screen-sharing or a shared digital doc rather than a physical printout, so both in-person and remote participants are looking at the same real artifact.

For the Ceremony Jigsaw and other small-group research activities, keep hybrid groups either fully in-person or fully remote rather than mixed, since coordinating shared notes across both formats in real time adds friction that distracts from the actual exercise.
