FIRSTS

COMPLETION CRITERIA

What counts as done, and how it triggers the Stage Two credential

A Citrus Edition Facilitator Resource • Companion to the FIRSTS Manual

FIRSTS • Completion Criteria & Credential Trigger

Stage Two • Professional Identity & Personal Brand

PURPOSE

This document defines exactly what “complete” means for Stage Two, at both the individual FIRST level and the full-stage level, and how completion connects to the program's credentialing system. Stage Two's completion standard is stricter than most stages because several of its FIRSTS produce externally visible, checkable artifacts — a live LinkedIn profile, a real headshot — not just worksheet answers.

Per-FIRST Standard

STANDARD

A FIRST counts as complete when the corresponding Templates worksheet has a genuine, specific answer in every required field, and for FIRSTS involving a real external action (B9's reputation ask, B39's portfolio review request), when that action has genuinely been taken, not just planned.

Stage-Level Completion Checklist

- All 40 Templates worksheets completed with genuine, specific answers (see per-FIRST standard above).
- Attendance or async completion confirmed for all 6 sessions.
- A live LinkedIn profile update, personal website (or documented decision it's not relevant to their field), and updated professional headshot, confirmed by the facilitator spot-checking the actual live profile, not just the worksheet.
- At least one completed video recording (FIRST B26 or B27) reviewed by the participant, confirmed via self-report of what they changed as a result.
- One specific, real inconsistency identified and corrected during FIRST B40, named explicitly at the stage close.

Facilitator Sign-Off

The facilitator reviews each participant's completed Templates workbook and spot-checks at least the LinkedIn profile update directly (the single most externally visible deliverable in this stage) before marking the stage complete in the program tracker. Spot-check for genuine specificity and real external action, not just worksheet completion — a worksheet claiming a LinkedIn update that wasn't actually made should not be marked complete.

Credential Trigger

HOW THE BADGE WORKS

Upon facilitator sign-off, the participant's record is marked "Stage Two Complete" in the program tracker, which triggers the Stage Two digital badge. As with every stage, badges accumulate visibly; the full-program certificate is issued only once all 16 stages are marked complete.
