

STAGE ONE • SELF-AWARENESS & CAREER CLARITY

FIRSTS

Self-Awareness & Career Clarity

SESSION 1

Foundations of Self

FIRSTS 01-06

Core Values Audit

- Values $\neq$ preferences
- 3 non-negotiables, not 10 nice-to-haves
- Your filter for every future offer

Career Vision

- A compass, not a fixed destination
- Write it as a letter from your future self
- Revisit annually — it should evolve

Personal Purpose Awareness

- Identity = what you do. Purpose = why it matters.
- Usually a pattern, not a lightning bolt
- Sustains you through rejection and setbacks

Personal Brand + Strengths

- Brand narrative: identity → strengths → skills → impact
- Specific beats impressive
- Hard skills AND soft skills both count

Weakness Awareness

- Not self-criticism — actionable growth areas
- Skill gap? Mindset? Habit?
- One 30-day action per weakness

SESSION 2

Aligning with the Market

FIRSTS 07-12

Passion Alignment

- Passion + capability, not passion alone
- Not every passion needs to be a job
- Find your 2 “anchor passions”

Industry Insight

- 3 trends, 2 growth areas, 1 major challenge
- A living document — keep updating it
- Beats stereotypes with real research

Career Path

- Rarely a straight ladder — lateral moves are normal
- Trace 3 real professionals' first moves
- Sets up Role Research next

Role Research

- One job posting is not enough data
- Focus on responsibilities, not just titles
- Build a real Fit Map: required vs. current

Salary Benchmarking

- Cross-check at least 3 sources
- Adjust for location
- Total comp, not just base pay

Career SWOT Analysis

- Pulls together 05, 06, 08, 09
- Be honest — not too harsh, not too generous
- End with one 90-day priority

SESSION 3

Working Style & Systems

FIRSTS 13-18

Skill Growth Plan

- 3–5 skills, not 15
- Course completion $\neq$ skill acquisition
- Weekly practice method + real milestone

Personality Assessment

- A starting hypothesis, not a verdict
- Connect it to real past experiences
- Never an excuse to avoid growth

Work Style Awareness

- One week of real observation
- What helps vs. what hinders your work
- Not everyone shares your style

Thinking & Decision-Making Style

- Decision quality > raw talent, early career
- No single “correct” style — match style to context
- Data vs. instinct: which do you over-rely on?

Learning Style Awareness

- Evidence-based, not just preference
- Test 3 methods on the same topic, 3 days
- Struggling $\neq$ lack of ability, often a method mismatch

Productivity & Focus System

- Pulls together Work Style + Thinking Style
- A system beats willpower
- Simple enough to actually sustain

Stage One, Complete

One system commitment, out loud, before we close.
