FIRSTS

COMPLETION CRITERIA

What counts as done, and how it triggers the Stage Eleven credential

A Citrus Edition Facilitator Resource • Companion to the FIRSTS Manual

FIRSTS • Completion Criteria & Credential Trigger

Stage Eleven • Tools & Technology

PURPOSE

This document defines exactly what “complete” means for Stage Eleven, at both the individual FIRST level and the full-stage level, and how completion connects to the program's credentialing system. Like Stage Two, several of this stage's FIRSTS produce genuinely checkable artifacts (a migrated calendar, a completed Git commit, a working automation) — completion here leans on direct spot-check where practical, not just self-report.

Per-FIRST Standard

STANDARD

A FIRST counts as complete when the corresponding Templates worksheet has a genuine, specific answer in every required field, and for FIRSTS requiring a real hands-on action (setting up a tool, completing a Git action, building an automation), when that action has genuinely been completed and, where applicable, verified to work, not just attempted.

Stage-Level Completion Checklist

- All 30 Templates worksheets completed with genuine, specific answers (see per-FIRST standard above).
- Attendance or async completion confirmed for all 3 sessions.
- At least one real, verifiable hands-on artifact confirmed by facilitator spot-check or participant demonstration: a live calendar/task system migration, a completed Git action, or a working automation.
- A genuine, honest Professional Software Stack map (FIRST O29) and Tool Efficiency Audit (FIRST O30) completed, naming at least one real tool being dropped.

Facilitator Sign-Off

The facilitator reviews each participant's completed Templates workbook and spot-checks at least one genuinely hands-on deliverable directly (e.g., asking a participant to briefly show their migrated calendar system or their completed Git action) before marking the stage complete. Spot-check for genuine specificity and real completion, not just worksheet answers describing an intended action.

Credential Trigger

HOW THE BADGE WORKS

Upon facilitator sign-off, the participant's record is marked "Stage Eleven Complete" in the program tracker, which triggers the Stage Eleven digital badge. As with every stage, badges accumulate visibly; the full-program certificate is issued only once all 16 stages are marked complete.
